- The Agricultural Knowledge and Innovation System (AKIS) in Campania Region: The Challenges Facing the First Implementation of Experimental Model
- Resource Struggle, Resultant Realities and the Future of Maragoli Land Use
- Evaluation of Vegetable Vermicompost on the Chemical Properties of Two Different Soils

**Journal of Agricultural Policy** is an internationally double blind peer reviewed journal published by CARI Journals USA LLC. The journal contains papers on sustainable crop production systems, economics of crop production, agricultural development, food access and nutrition. The journal provides vast knowledge on the principles and practice of crop and animal husbandry production systems. It also aims at addressing the challenge of global food security as well as probing the constraints physical, biological, socio-economic and political, which not only limit crop and food production but also the ability of people to access a healthy diet. Journal of Agricultural Policy is a world-class journal, publishing multi-disciplinary and geographically differentiated relationships between agricultural production systems, policy arenas and their relationships.

**Nicholas M. Jacob**  
Department of Chemistry, University of Nairobi

**Olawepo Taiye Femi**  
Department of Agricultural Science, Kwara State College of Education, Ilorin, Nigeria
